MINUTES OF COMMITTEE ON MARINE LIGHTING

Date of distribution: 11 July 1952; [redacted]

25X1X [redacted]

The document consists of photostats of 7 typewritten pages containing the minutes of the fourth meeting of the subcommittee on standardization and maintenance of quality of the Committee on Precision Fittings for Ships and Marine Lighting on 30 October 1951 at the Ship Lantern Plant in Ueckermuende.

Thirteen officials attended the meeting and reported on the following topics after inspection of the plant:

Testing of products according to established specifications and for good quality.

Improvement of products.

Establishment of a subsidiary outlet for the Lantern Plant.

Report of the testing office.

The report on the improvement of products notes a conversion of all screw type sockets and holders to bayonet type sockets and holders.

The report on the establishment of an outlet for the factory contains a list of the type and number of lanterns used on the GDR ships. The document also discusses several other electrical supplies used by the ships. Some of the lanterns are to be shipped to the Soviet Union (waterproof lanterns).

The document notes in closing that the next meeting will consider the matter of technical standards for delivery of nautical equipment.
